

PRINTING CAPABILITIES AND ART FILE REQUIREMENTS

Flexo Printing

Premier Georgia Printing has capabilities to produce pressure sensitive labels and non-pressure sensitive tags with our Flexography Division. Our web presses can produce widths up to 13 inches in die cut, butt cut, or sheeted products. With a vast library of cutting dies, we can find a size perfect for your needs or have a custom die created for your specific requirements. Paper substrates include matte, semi-gloss, point board, special stock for thermal printers, plus much more. Finishing options include UV Varnish or Overlamine.

Art File Requirements:

- All important information 0.125" from trim edge
- Bleeds 0.0625" outside of trim
- Gradients not to drop below 5%
- No rules smaller than 0.4pt, no reverse rules smaller than 0.75pt
- No text smaller than 3pt
- No reverse type on 4 color process smaller than 8pt
- All placed photos must be CMYK format, no less than 300dpi, at 100% actual size, linked and not embedded
- We will set the trapping specific to our presses
- Output line screen 150/4000 utilizing Digital Computer-To-Plate technology
- 8 color max with no UV varnish, 7 colors with varnish
- All colors are to be CMYK process or Pantone spot colors, no RGB
- Please zip/stuff files in original file format (**Adobe Illustrator CC** preferred), please include all fonts, all placed/imported support files, and a pdf for viewing.

Offset Printing

Premier Georgia Printing produces brilliant and vibrant products with our state-of-the-art offset press. Printing on lightweight sheets up to 24pt board, we can custom print virtually anything you can dream up. Utilizing 4 color process printing technology, we can reproduce millions of colors. Finishing options include Aqueous or Varnish coating, Overlamine, Scoring, Folding, Gluing, Double Sided Tape, and Custom Die Cutting.

Art File Requirements:

- All important information 0.125" from trim edge and score/fold lines
- Bleeds 0.125" outside of trim
- No rules smaller than 0.25pt, no reverse rules smaller than 0.5pt
- No reverse bold timesteps smaller than 4pt and no thin or light timesteps smaller than 6pt
- All placed photos must be CMYK format, no less than 300dpi, at 100% actual size, linked and not embedded
- We will set the trapping specific to our presses
- Output line screen 175/2400 utilizing Computer-To-Plate technology
- All colors are to be CMYK process, no RGB
- Please zip/stuff files in original file format (**Adobe Illustrator CC** preferred), please include all fonts, all placed/imported support files, and a pdf for viewing.

Submitting Art Files: For your convenience we offer an ftp site that is both quick and user friendly. Please call us at 770-287-1337 to receive your assigned user name and password. Once you have your log in information click on the link below and follow the simple on screen instructions to complete your upload.
